

**Influenza vaccine dosing algorithm for children aged 6 months through 8 years —
Advisory Committee on Immunization Practices, United States, 2015–16 influenza season**

*The two doses need not have been received during the same season or consecutive seasons.

^Doses should be administered ≥ 4 weeks apart.

Alternate Text: The figure above is a flow chart showing an influenza vaccine dosing algorithm for children aged 6 months through 8 years in the United States for the 2015-16 influenza season. An asterisk footnote symbol appears at the end of the statement, "Has the child received 2 total doses of trivalent or quadrivalent influenza vaccine before July 1, 2015?" The corresponding footnote reads, "The 2 doses need not have been received during the same season or consecutive seasons." Also, a dagger footnote symbol appears immediately after the phrase "2 doses" in the following statement, "2 doses of 2015-16 influenza vaccine." The corresponding footnote reads, "Doses should be administered 4 weeks apart."
